WELCOME TO THE GUIDE ON EDUCATION AND TRAINING FROM THE UNITED KINGDOM FOR THE INTERNATIONAL OIL AND GAS INDUSTRY. THIS REFERENCE TOOL GIVES YOU IMMEDIATE INFORMATION ABOUT AND CONTACT DETAILS OF SOME OF THE UNITED KINGDOM FINEST PROVIDERS OF TRAINING AND EDUCATIONAL PRODUCTS AND SERVICES.

The United Kingdom's capability in this important area has already been established, tested and perfected over several decades of impressive and profitable exploration and production of the North Sea oil and gas reserves. Many challenges have been overcome through the efficiency of well trained craft workers, technicians, support personnel, engineers and managers. The United Kingdom business and educational sectors reacted to demand by equipping industry workers with the qualifications and skills training needed to deal with complex commercial, technological and management matters. Universities, institutions and training providers in the United Kingdom offer a very broad range of courses that can often be adapted to meet the specific needs of national and international operators, service companies, government and non-government institutions and organisations. Usually the courses are given locally, but blended learning is increasingly and frequently used to help offset operational or budgetary constraints.

Promoting competence in health and safety in the oil and gas industry is a priority the world over. As one of the best regulated working environments in the world, the United Kingdom has developed and now offers a highly sophisticated range of training programmes and competence assessment methods in health, safety, environmental management, survival and management of emergencies among many others.

The United Kingdom's oil and gas industry has traditionally worked very closely with the education and training

sector to ensure that the courses cover all the levels of training necessary, including basic, technical and professional skills, education at undergraduate and postgraduate levels, as well as specialised, short courses. Some of the main universities and institutions have established business training programmes for clients in most of the major producing basins in Northern Europe, the Middle East, West and North Africa, South America and the Far East.

The institutions listed here are committed to providing their services that meet the individual needs of clients; therefore this guide will be of immediate use to those who have responsibility for the development of a competent, professional and safe workforce.

It is the intention of the British Council and UK Trade and Investment that this document should continue to be developed as a useful resource.

EDUCATION AND TRAINING FOR THE OIL AND GAS INDUSTRY

After almost 30 years of exploration and production in one of the planet's most hostile environments, the United Kingdom's oil and gas industry has rightly won worldwide respect for its achievements, pioneering technologies, good management practices and particularly its high operations, safety, health and environmental standards.

The UK oil and gas sector's rapid growth through the 70's and 80's

required a rapid expansion in the supply of trained personnel. A specialised network of education and training institutions developed to meet the needs of companies operating in the North Sea, resulting in enhanced provision of skilled manpower, improved safety standards and increased productivity in operations. The UK offers high-quality, specialised training delivered in centres ranging from small private training providers to colleges and universities offering sophisticated equipment and research tools. Distance and blended learning options have enabled the UK training experience to be exported to the world's leading oil centres. The United Kingdom's experience can help to develop training that is better aligned to the needs of the oil and gas industry in your operations sphere, and achieve international excellence in the following areas:

- Petroleum Engineering
- Offshore Prospecting and Production Engineering
- Reservoir Management
- Drilling Engineering
- Ocean Technology
- Maintenance and Repair
- Project Management
- Environment Engineering
- Environment Management
- Health & Safety Training
- Fire Fighting Training
- Management and response in Emergency Situations
- Electrical Hazard Training
- Training in Stability and Dynamic Positioning
- Technicians Training (electrical, mechanical, welding)

- Training in Offshore, Operations and Maintenance
- Professional Development based on competence and education systems
- International Law and Petroleum Law
- International Business
- International Finance
- International Economics
- Supply Chain Management
- Project, Maintenance and Asset Management

In this guide you will find a number of education and training organisations, which have been identified as OPITO accredited.

OPITO is a not-for-profit industry-owned organisation. It exists to deliver innovative solutions that assist the industry, developing a safe workforce of the appropriate size and ability to meet business demands and sustain the offshore industry in the long term. The OPITO Approvals process is widely recognised and respected by government bodies, employing companies and trade associations throughout the UK and internationally. The process gives customers and stakeholders confidence that standards of training in emergency response and safety related roles, as defined by the Industry, are delivered as specified by them and in a safe environment. OPITO's main areas of business include Emergency Response Standards and Approval of Training Delivery; Workforce Competence; Petroleum Open Learning.

PROMOTING COMPETENCE IN HEALTH AND SAFETY IN THE OIL AND GAS INDUSTRY IS A PRIORITY THE WORLD OVER.

STANDARDS & ACCREDITATIONS IN THE OIL & GAS INDUSTRY

THIS GUIDE

This guide lists some of the British providers involved in Education and Training specific to the Oil and Gas Industry. Included are:

- Training providers and university consultancy, offering short courses;
- Vocational education institutions, offering a wide range of professional qualifications, craft and technician training and short courses;
- Private training providers, offering training in specialised areas of the oil and gas industry;
- Private training providers, offering generic courses such as project management or planning focused on oil and gas;
- English Language Training companies
- Certification bodies offering standard customised qualifications both in the United Kingdom and overseas;
- A professional body representing people working in the oil and gas sector.

The organisations are listed in alphabetical order by name, including their website and contact details, followed by summarised information on the training courses offered. The courses mentioned are those directly connected with activities in the oil and gas industry. Many UK training institutions work with companies from this sector throughout the world.

A separate list of universities offering undergraduate and post-graduate courses directly related to the oil industry is also included, as well as information on the Chevening scholarship programme.

Regularly updated information on higher education courses can be found on the British Council's portal for educational opportunities in the United Kingdom, the Education UK website (www.educationuk.org).

Other general sources of information on courses are:

www.educationuk.org
www.opito.com
www.trainuk.com
www.petroleum.co.uk
www.ucas.com
www.trainuk.com

NOTE:

Whilst every care has been taken in compiling the information in this guide, the British Council and UK Trade and Investment cannot be held liable for mistakes or omissions, and inclusion of any organisation in this guide does not constitute approval or endorsement in any way. The information on specific organisations was provided by the companies themselves, and therefore the opinions and ideas expressed do not necessarily reflect those of the British Council or UK Trade and Investment.

CITY & GUILDS

1 Giltspur Street
London
EC1A 9DD
England
Contact: Jonathan Hardy
Tel: +44 (0)20 7294 2659
Fax: +44 (0)20 7294 2414
Email:
business_unit@cityandguilds.com

www.cityandguilds.org

City & Guilds is the UK's leading vocational awarding body and we are recognised in 70 countries worldwide. We offer over 500 qualifications in over 28 industry sectors including the oil and gas sector. Our qualifications are designed to help people and businesses achieve growth, prosperity and success.

We have experience of building customised oil and gas qualifications to suit your in-house training needs and accrediting the training and assessment programmes of many organisations. We have worked within the oil and gas industry with names which include Shell Petroleum Development Company, Bahrain Petroleum Company, Sirte Oil, Saudi Arabian Texaco and many more.

EDEXCEL

190 High Holborn
London WC1V 7BH
England
Contact: Jenny Yau
Tel: +44 (0)870 2409800
Fax: +44 (0)20 7190 5700
Email: europeamer@edexcel.org.uk

www.edexcel.org.uk/international

Edexcel is the largest awarding body in the UK with expertise & experience in education & training worldwide. It offers a diverse range of vocational & academic qualifications, assesses and provides quality control and certification delivered to more than four million learners in over 100 countries worldwide every year.

Our globally recognised qualifications and accreditation services provide employees with the essential tools for employment – Skills, Understanding and Behaviour. As a result, employers are able to raise levels of performance, retention and recruitment – Effective Education for Employment.

As part of Pearson, the world's largest education company, we have worked with many different sectors and companies, including Oil and Gas.

OPITO

Minerva House
Bruntland Road
Portlethen
Aberdeen AB12 4QL
Scotland
Tel: +44 (0)1224 787800
Fax: +44 (0)1224 787830
Email: reception@opito.net

www.opito.net

Based in Aberdeen, with a regional office in Kuala Lumpur OPITO is a not-for-profit organisation owned and led by the Oil and Gas industry employers and trade unions. OPITO exists to provide the global industry with innovative skills solutions that assist the oil and gas extraction industry in developing a highly skilled, competence and safe workforce.

Business areas include:

- Offshore Emergency Response Standards: (from basic travel and survival to managing a major offshore emergency)
- Industry Occupational standards: (Processing hydrocarbons, Electrical, Instrument and Mechanical maintenance, well services, drilling operations and safety services)
- Approval of learning suppliers to the industry via the globally recognised OPITO "Approval" brand: (64 suppliers in 23 countries)
- Pan industry workforce development tools (on line skills testing, assessor training, bespoke training program design for key job roles)
- Design and management of technician apprentice schemes for process and maintenance job roles
- Competence Assurance Services (System audit, system design consultancy, system measurement, system approval, occupational certification)
- Workforce data research and analysis

SCOTTISH QUALIFICATIONS AUTHORITY

The Optima Building
58 Robertson Street
Glasgow G2 8DQ
Scotland
Tel: +44 (0)845 279 1000
Fax: +44 (0)845 213 5000
Email: customer@sqa.org.uk

www.sqa.org.uk

SQA is an executive non-departmental public body (NDPB) sponsored by the Scottish Executive Education Department. It is the national body in Scotland responsible for the development, accreditation, assessment and certification of qualifications other than degrees.

The overall aim of the SQA is to manage the qualifications system below degree level to allow students to fulfil their potential to participate in the economy, society and communities of Scotland. There are approximately 1,470 centres approved to offer our range of qualifications.

SQA believes that global interaction in education and training benefits our customers, our clients, our partners and SQA through the sharing of expertise and experience.

This is reflected in the three key areas for action detailed in our International Strategy – namely:

- International bench marking and intelligence
- Promoting Scottish education and training world-wide.
- Supporting education and training worldwide.

UK TRAINING PROVIDERS FOR THE OIL & GAS INDUSTRY

A1 SAFETY TRAINING CONSULTANTS (1995) LTD

Portland Wharf Support Base
Southtown Road
Great Yarmouth
Norfolk NR31 0JJ
England
Tel: +44 (0)1493 443883
Fax: +44 (0)1493 443848
Email: aillsley@a1safetytraining.co.uk

www.a1safetytraining.co.uk

Providers of training courses focused on onshore and offshore lifting operations, specialising in training and assessing crane operators.

ABALT SOLUTIONS LTD

7 Queens Gardens
Aberdeen AB15 4YD
Scotland
Contact: Rafael V Jaramillo
Tel: +44 (0)1224 619218
Fax: +44 (0)1224 626227
Email: r.jaramillo@abaltsolutions.com

www.abaltsolutions.com

Members: EIC, GTEP, SPE

Abalt offers tailor-made training programmes and education for operator and service companies with experience in providing training in Algeria, Nigeria and Russia.

ABERDEEN DRILLING SCHOOL LTD

50 Union Glen
Aberdeen AB11 6ER
Scotland
Contact: Tom Donnelly
Tel: +44 (0)1224 572709
Fax: +44 (0)1224 582896
Email: info@aberdeen-drilling.com

www.aberdeen-drilling.com

A private training company supplying the drilling industry worldwide with training courses in well control and drilling technology. Accredited to the IWCF and IADC for well control certification training.

Training conducted at any location (including on-the-rig refresher training) and the courses are customised to meet individual requirements such as:

- Training to reduce unscheduled events
- Stuck pipe prevention
- High-pressure, high-temperature wells
- Deepwater well control
- Horizontal well control
- Advanced well control (including IADC WellCAP Plus)
- Drilling technology
- Effective communication and leadership

Training regularly conducted at international locations, which have included various countries in the Middle East and North Africa as well as Azerbaijan, France, India, the Netherlands, Nigeria, Norway and Trinidad.

THE ADAM SMITH COLLEGE, FIFE INSTITUTE OF APPLIED TECHNOLOGY

Waverley Road
Mitchelston Industrial Estate
Kirkcaldy, Fife KY1 3NH
Scotland
Tel: +44 (0)1592 223600
Email: enquiries@adamsmith.ac.uk

www.adamsmithcollege.ac.uk

Member: Society of Petroleum Engineers

Recognised educational establishment, sub-chapter of Aberdeen section SPE Overseas Training Projects: General, Middle East and North Africa; Fifteen years involvement in education and training; Diverse technical training for individual clients, primarily national oil companies.

The Adam Smith College is the third largest college in Scotland. It is the only institution offering HND in Petroleum Engineering, full time and through distance learning.

AEA

329 Harwell
Didcot, Oxon
OX11 0QJ
England
Tel: +44 (0)870 190 1900
Fax: +44 (0)870 190 8109
Email: enquiry@aeat.co.uk

www.aeat.co.uk

Short courses on a wide variety of topics, including:

- Environmental Risk Assessment
- Environmental Monitoring
- Environmental and Social Impact Assessment
- Oil spill management
- HSE management systems
- Environmental Auditing
- Contaminated Land Assessment
- Environmental Planning
- Permitting
- Waste minimisation/waste handling

ALLIED HEALTH & SAFETY

13 – 15 Meteor Close
Airport Industrial Estate
Norwich, Norfolk NR6 6HQ
England
Tel: +44 (0)1603 258088
Fax: +44 (0)1603 258099
Email: info@alliedhs.co.uk

www.alliedhs.co.uk

Members: RTITB, COGENT, Lift Truck Operator & Examiner Training, New Registration.

Overseas Training Projects: Holland – Mobile Elevated Work Platform, Stena Line, June 2004

Allied Health & Safety is a professional training provider dedicated to the provision of high quality Mechanical Handling & Health & Safety Training services to industry. They are accredited to the RTITB, are registered with Cogent and have many years of experience in the provision of training.

ALLOMAX ENGINEERING

Allomax House
Murcar Commercial Park
Denmore Road, Bridge of Don
Aberdeen AB23 8JW
Scotland
Tel: +44 (0)1224 827217
Fax: +44 (0)1224 827218
Email: scott.pirie@allomax.com

www.allomax.com

Training on well completion projects, production technology, artificial ascent, sand control, formation damage, risk management and management of knowledge on drilling projects. Many in-depth courses for graduate engineers are given as short courses for other interested professionals. Allomax are a well engineering consultancy that provide well engineering personnel, project management systems for building wells (Wellmax), as well as the leading systems for ensuring well engineering competence (Casmox).

ALPHATANIA LTD

35 New Bridge Street
London EC4V 6BW
England
Tel: +44 (0)20 7332 9910/11
Email: training@alphanatia.com

www.alphanatia.com

Alphanatia provides training courses for the natural gas and LNG industries, whether public courses with a predefined programme or bespoke training tailored to clients' individual needs. They offer course materials and interactive training for professionals in a wide range of disciplines, companies and countries. Training programmes regularly conducted in Europe, Asia, the Middle East and Africa.

ANGUS COLLEGE

Business Development Centre
Keptie Road, Arbroath
Angus DD11 3EA
Scotland
Tel: +44 (0)1241 432600
Fax: +44 (0)1241 876169
Email: marketing@angus.ac.uk

www.angus.ac.uk

Offers short courses and bespoke courses in management and leadership training, team management.

APPROPRIATE TRAINING LTD

Withy Trees House
175 177 Garstang Road
Fulwood, Preston
Lancashire PR2 8JQ
England

EPS provides Petroleum Engineering software, training and services. The training courses encompass several technology and asset management areas and can be open or in-company. Some of these courses include: Production Asset Management (PAM), Well Test Analysis, Gas Field Development, Production Enhancement, Applied Basic Reservoir Engineering.

**EEEGR (East of England Energy Group)**

Beacon Innovation Centre
Beacon Park, Gorleston
Great Yarmouth
Norfolk NR31 7RA
England

Contact: Johnathan Reynolds
Tel: +44 (0)1493 446535
Fax: +44 (0)1493 446536
Email: office@eeegr.com

www.eeegr.com

EEEGR is a business led, business driven energy industry association with a membership comprising of more than 290 members ranging from one-man independents to the energy industry's biggest multi-nationals plus public sector agencies, not for profit bodies and academic institutions.

EEEGR's vision for the region is the ".....sustainable production and wise use of energy"

With the strategic importance of energy in the UK established, the value of a representative and specialist organisation supporting sector development is crucial. EEEGR is the only regional body and representative voice with a remit for 'all energy' across the East of England. It provides

support; cohesion and stimulation to help members and the wider energy community deliver against its key objectives. Established in April 2001 it has consistently grown to meet these needs as an 'all energy' body.

EEEGR operates against five key strategic themes aligned to its vision, which are:

- regional industry promotion in a global market,
- strengthening the region's ability to do business internationally,
- encouraging innovation, knowledge transfer and technology acceleration,
- stimulating supply chain improvement, and diversification,
- developing skilled people for the future of the industry. EEEGR acts as an effective and unique bridge working between industry, the public sector and academia.

**EFFECTIVENESS CONSULTANTS UK LTD**

Blairs College, South Deeside
Aberdeen AB12 5LF
England

Evolve Training is a highly successful company with a 15-year track record of delivering Health and Safety, Mechanical Skills, Personal Development and IT training. The company also provides safety consulting and support services. We believe that the company has an excellent range of courses and services, a high standard of customer satisfaction and develop our capabilities through structured marketing and business development.

Our mission is 'to help people achieve exceptional performance in a safe and healthy work environment'.

The four main areas of business:

- Training
- Health & Safety Equipment
- Safety Consulting & Support Services
- Conference Facilities

Evolve was a finalist in the 2006 Enterprise North East Awards in the Alick Buchanan Smith Spirit of Enterprise Category.

The company has over 700 clients and each client has an allocated Account Manager. This improves the quality of personal service provided and focuses sales and business development activities, making sure clients know about our flexible approach to dates, and tailoring courses to their requirements.

Company Accreditations

To ensure that we can compete with the multi nationals, the demands of customers and a changing market place we have gained Investors in People. We have accreditation from British Safety Council, OPITO, ECITB, ITTSAR, Chartered Institute of Environmental Health, and Institute of Occupational Safety & Health. This spread of accreditations shows to our customers that we have the knowledge and have reached the standard as a company.

Tel: +44 (0)1926 462917
Email: info@gtep.org.uk

www.gtep.org.uk

Members:
Society of British Gas Industries (SBGI)
Energy Industries Council (EIC)
Society of Marine Industries (SMI)
Pipeline Industries Guild (PIG)

GTEP's role in the UK is to be the direct interface between the supplier and customer markets. GTEP can offer a credible route for customers to access the latest information relating to issues that are affecting the customer directly.

GTEP adds value because it is focusing on delivering training and education services in the oil, gas and petrochemical industries. GTEP's role as a supplier identifier also gives it a unique role as a co-ordinator of the delivery of groups of services to clients from a range of suppliers.

GTEP as a supply base co-ordinator puts it in the unique position of being able to act as a 'portal' for linking suppliers and customers together in a very efficient way.

The Centre for Professional Development presents a diverse range of intensive short courses for professionals. Courses of special interest to the oil and gas industries include the use of special analysis in reservoir engineering, reservoir characterisation and modelling, and integrated reservoir management and modelling, and integrated reservoir management. Short MSc Petroleum Engineering Courses are available for petroleum engineering professionals with the necessary background who wish to develop their knowledge in specialist areas. Modules cover Fundamental Knowledge, Reservoir Characterisation, Well Performance, Reservoir Performance and Field Development.

Using Special Core Analysis in Reservoir Engineering – 3 day course designed for reservoir engineers and geologists involved in modelling petroleum reservoirs, and for geoscientists working in the area of reservoir characterisation.

Integrated Reservoir Management course 12-week course where 8 weeks are spent at the IFP School in France and 4 weeks at Imperial College London. The course is structured around field case studies and background lectures in order to familiarise engineers with real life problems associated with the optimal appraisal, development and operation of petroleum resources and to provide a basis for management decisions.

Email: CGower@kbc.com
www.kbc.com

KBC is the leading independent, process engineering consultancy providing a wide range of services to the hydrocarbon and other process industries.

At the heart of KBC's Operational Excellence (OpX) model is the idea that people are the most valuable asset within an organisation. To attain the level of performance required to achieve and sustain OpX, organisations must invest in continually improving employee performance. Effective training programs provide the foundation for improving human performance through the increasing employee competence. When developed and delivered correctly, targeted training systems provide employees with the knowledge and skills required for the job and motivate them to strive for excellence. KBC's Human Performance Improvement division is a recognised leader in developing and delivering world class technical and non-technical training for point-of-manufacturing employees (e.g., Process Control Operators, Field Equipment Operators, and Shift Team Supervision). This division is comprised of highly experienced professional consultants, trainers, and training system developers.

KBC provided training courses on many aspects of our Oil and Gas operations, including process unit operations and optimisation, plant economics, profit improvement techniques, world class planning techniques as well as KBC's proprietary software packages. KBC's approach to training is to customise courses as far as possible to meet the clients' specific needs.

Email: barry.walsh@northumbria.ac.uk

www.mic.unn.ac.uk/tpi/tpi.aspx

Northumbria Commercial Enterprises (NCE) brings many years of experience in providing practical, relevant and innovative solutions to industry, commerce and the public sector. We offer a wide range of problem solving and knowledge support tools for business from our University in training and consultancy.

The school of Engineering and Technology runs many courses accredited by professional bodies, e.g. IEE and IMechE. The school has enthusiastic and competent staff, modern laboratories, good industrial links and good Engineering applications.

NORTH WEST AMBULANCE SERVICE NHS

Ambulance Headquarters
449-451 Garstang Road
Preston, PR3 5LN
England
Tel: +44 (0)1772 862666
Fax: +44 (0)1772 861003
Email: barry.eagers@nwas.nhs.uk
www.lancashireambulance.com

One of the company's main activities is emergency medical training in the oil and gas industry. The company is very active in the United Kingdom and the Middle East. Last February, North West Ambulance Service (formerly known as Lancashire Ambulance Service) set up a joint-venture with a Brazilian company to give the country's first chemical and biological decontamination course. Its trainers have given paramedic, technical and driver training, and created links with important trading companies and health departments and organisations in countries such as Brazil, Qatar, Canada, Bahrain and Portugal. The North West Ambulance Service is sought after due to its reputation as being the best in the country, as well as to learn more about how it can help other countries to develop similar services.

RECOGNISED BY OPITO

PETROFAC TRAINING

Pavilion 4
 Craigshaw Business Park
 Craigshaw Road
 West Tullos
 Aberdeen AB12 3QH
 Scotland
Tel: +44 (0)1224 899707
Email: bookings@petrofactraining.com
www.petrofac.com

Petrofac Training is a leading provider of competence-led training and consultancy solutions to the international energy industries, and the training and consultancy arm of the Petrofac Group.

Petrofac Training combines the specialist knowledge, expertise, quality and enviable track record spanning three decades of RGIT Montrose and Rubicon Response in one company.

We have a global presence with operations and facilities across five regions: Europe; The Americas; Middle East and Africa; Russia, Central & Southern Asia; and Asia Pacific, each with a blend of local and expatriate personnel delivering global standards locally.

Our capability is defined within three core areas: the provision of competence-led training services; consultancy services to identify or assess competency gaps or risks within an organisation; and managed solutions tailored to meet the needs of our customers.

Our mission is to develop competence and minimise risk within our customer's operations. Our integrated approach ensures that, no matter what the training and competency requirements are, we have an effective solution.

Members: Northern Offshore Federation, Institute of Measurement & Control

Overseas Training Projects in Libya, Saudi Arabia, Kazakhstan, Hong Kong, Ireland, Qatar, Kuwait, Nigeria, Australia

Roxby Training Ltd has been delivering specialist engineering training for over 40 years. With accreditations from EDEXCEL, JTL, City & Guilds and EAL our training is hands-on, competence based and practical, using real-life experiences not just theory.

Our portfolio of courses includes:

- Instrumentation
- Electrical
- Mechanical
- Health & Safety
- Gas Turbines
- Health and Safety
- Lifting Operations
- Plant
- Management & Technical

**ROYAL HOLLOWAY (UNIVERSITY OF LONDON)**

Egham Hill
Egham
Surrey TW20 0EX
England

Tel: +44 1784 434455
Fax: +44 1784 437520
Email: liaison-office@rhul.ac.uk

www.rhul.ac.uk

Offers Applied Geosciences courses specially relevant to the petroleum industry; Master's degree in Science on Basin Evolution and Dynamics, Master's Degree in Tectonic Sciences, special short courses in accordance with industry demands in the Basin Analysis, Geotectonics, Structural Geology, Stratigraphic Model and Sedimentology fields.

**RPS ENERGY**

Centurion Court
85 Milton Park
Abingdon OX14 4RY
England

Tel: +44 (0)1235 438000
Fax: +44 (0)1235 864451
Email: rpsmp@rpsgroup.com

www.rpsgroup.com

RPS Energy has been providing Technical, Commercial and Project Management Support to well operations for more than 20 years. During this time they have provided such services to well over 100 oil and gas companies including independent operators and some national companies and government agencies, with a team of more than 125 personnel engaged in projects in a wide variety of land and marine locations – world-wide.

Well operations comprise support to oil and gas exploration, appraisal and production drilling.

The services offered include:

- Integrated Well Planning from concept to completion
- Well design and Construction
- Drilling Project Management
- Well Engineering Studies (pre-well studies – extended reach, underbalanced drilling, post well evaluations)
- Operations Geology
- Wellsite Geology
- Wireline Log QC
- Borehole Seismic QC
- Geosteering
- Wellsite Pressure Prediction
- Composite Logs
- Post Well Reports
- Supporting Software
- Log Drawing (Pierre/Wellcad)
- Intoto (well reporting)
- WellConnect (web data hosting)
- VSProwess (VSP data validation)
- Equipoise (pressure evaluation)

**THE SAFETY HUB**

Harbour Buildings
South Quay
Ferryden
Montrose DD10 9SL
Scotland

Tel: +44 (0)1674 673963
Fax: +44 (0)1674 660401
Email: info@safetyhub.com

www.thesafetyhub.com

It supplies leadership training in safety, controlled risk, emergency management, behavioural change and a wide range of services for all industries. Specialised in the energy sector, its consultants have extensive experience in the oil and gas sector, having worked for the world's main companies in the sector.

**SCHLUMBERGER INFORMATION SOLUTIONS**

www.siracertification.com

Members: CogDEM Member, APEA
Member Overseas Training Projects:
Abu Dhabi, Turkey and USA

SIRA's trainers have provided expertise in hazardous area applications for more than thirty years. Training is provided to all industries covering topics dealing primarily with ATEX/DSEAR legislation, Area Classification, Inspection and Risk Assessment. SIRA also offers courses assisting manufacturers in the design of equipment intended for use in Potentially Explosive Atmospheres. Courses are also available for Functional Safety issues (IEC 61508/61511). SIRA has provided training for the Oil, Gas, Petrochemical, Food, Motor Manufactures and Waste Industries.

SOCIETY FOR UNDERWATER TECHNOLOGY

80 Coleman Street
London EC2R 5BJ
England
Tel: +44 (0)20 7382 2601
Fax: +44 (0)20 7382 2684
Email: info@sut.org

www.sut.org

The SUT is an international learned society actively promoting the development, dissemination, and exchange of ideas, information and technology arising from or related to the underwater environment. Founded in 1966, the Society brings together organisations and individuals from over 30 countries with a common interest in subsea technology, ocean science and offshore engineering. It has branches in Aberdeen, Rio de Janeiro, Houston and Perth, Western Australia.

SOUTH TYNESIDE COLLEGE

Tyne and Wear NE34 6ET
England
Tel: +44 (0)191 4273772
Fax: +44 (0)191 4273918

www.stc.ac.uk

South Tyneside College provides training for Merchant Marine, Offshore and Fabrication areas, delivering both vocational and academic training to Degree level in a wide range of maritime disciplines. South Tyneside College are the UK National Centre of Vocational Excellence in Nautical Science and Marine Engineering.

STAG GEOLOGICAL SERVICES LTD

3 Fortuna Court
Calleva Park, Aldermaston
Reading RG7 8UB
England
Tel: +44 (0)118 9820151
Fax: +44 (0)118 9820152

Stag provides wellsite and office based geological services, training courses and data management services to the upstream oil and gas industries. Short courses include drilling and well engineering, operations and wellsite geology, basic petroleum geology, log interpretation, formation pressure evaluation and geosteering. Open courses are presented at our training centre in the UK and in-house programmes are available world-wide. Recently, courses have been presented in Angola, South Africa, Turkey, Serbia, Austria, Trinidad & Tobago and Libya. Course curricula and duration can be tailored to meet specific requirements.

STUDY GROUP LTD

Corporate training including:

Masters Business and Engineering programmes delivered by RGU, including:

- Oil & Gas Engineering
- Drilling and Well Engineering
- Petroleum Production Engineering
- Asset Integrity Management
- Subsea Engineering (from 2008)
- MBA Oil & Gas Management
- Oil and Gas Law
- Project Management

Customised short courses in Engineering, Business and HSE, including:

- Offshore Engineering
- Drilling Operations and Management
- Deepwater Technical Training
- OIM Training
- Workover and Well Completion Technology
- Human Resource Management
- Graduate Certificate in Management
- Supply Chain Management
- Executive and Technical English
- HSE Management
- Risk and Hazard Management

People Purpose Passion

Our mission is to be confirmed as THE change catalyst organisation that adds zest to individuals, teams and organisations – "inspiring tomorrows today".

Our roots are in the North Sea with branches on an international level. We deliver high yield benefits to our clients that includes improved working relationships, productivity, quality and cost reduction.

We are an executive coaching and training organisation that facilitates powerful and creative learning experiences designed to:

- Release the latent potential of your People,
- Creating a clear Purpose for the future
- Harnessing their Passion in an empowering way...

20|20 BUSINESS INSIGHT

Brook House, Brook Street
Broughty Ferry
Dundee DD5 1DQ
Scotland
Tel: +44 (0)1382 730880
Fax: +44 (0)1382 779442

www.2020.eu.com

20|20 is a specialist provider of project management and leadership training to the global oil & gas industry. Our internationally-accredited programmes can lead to IPMA (www.ipma.ch) qualifications recognised in 41 countries and these programmes are often customised to meet specific requirements. We have a wide range of courses from an Introductory Certificate through to Advanced Project Management; please visit www.2020.eu.com for our brochure download. Our courses are based around industry-specific case studies and content, whilst meeting the requirements of the IPMA's International Competency Baseline.

HIGHER EDUCATION COURSES IN OIL & GAS

Image courtesy of Shell International Ltd

The Higher Education institutions listed below offer a variety of undergraduate, postgraduate and business orientated short courses. Since the information regarding courses changes on an annual basis the list below provides the subject areas covered at each establishment. Please refer to the institution's own website for up-to date details regarding the level and length of study for a particular topic.

MATRIX OF OIL & GAS TRAINING COURSES IN THE UK

Image courtesy of Shell International Ltd

Training Types

Accounting – oil and gas
 Arbitration and Dispute Resolution
 Auditing/ competency assurance
 Business Process Analysis, Re-engineering
 Complex Hazardous Areas
 Contracts, Negotiations and Agreements
 Corrosion control engineering
 Data profiling
 Design/Operation of Technical Training Facilities
 Distance learning and e-learning
 Downstream operations
 Drilling engineering & inspection
 Drilling safety and risk management
 Economics of petroleum
 Electronics
 Emergency Response/Management
 Engineering – completion of wells
 Engineering – oil and gas
 Engineering – oil reserves
 Engineering – mechanical and electrical
 Engineering safety
 Engineering software
 Engineering – underwater
 English language especially for business
 Environmental impact evaluation
 Environmental law
 Environmental monitoring
 Environmental response systems
 Environmental risks
 Finance, Investment (including trading), Taxation
 Fiscal Analysis
 Formation Evaluation
 Gas processing
 Geology/geosciences
 General Consultancy and training
 Geographic Information Systems (GIS)
 Government policy, licensing and regulation
 Health and Safety legislation
 Helicopter operations
 HSE – health, safety, environment
 Hydraulic Bolt Tensioning
 Industry Association/signposting
 Information technology
 Instrumentation
 Insurance including loss adjustment
 Integrity & Strategic Management
 Introduction to oil and gas industry
 Laboratory techniques

	Benson Payne Ltd	BMT CORDAHLTD	Bournemouth Business School Int. Training Types

Law including international law
 Log Interpretation
 Logistics & Transport including dangerous goods
 Lubricants & hydraulics tech/liquid measurement
 Management development
 Management of training/education relationships
 Marketing
 Mechanical skills
 ME & I
 ME & I maintenance
 Medical
 MEWPs Training
 Mud and solid wastes control
 Natural gas systems
 Naval architecture
 Offshore operations
 Offshore structure design
 Oilspills management
 Onshore Pipeline Engineering
 Operations
 Pipeline Corrosion
 Pipeline inspections & defect assessment
 Plant & Machinery (including rotating)
 Pressure Vessel Inspections
 Processing
 Procurement, stock control & procedures
 Production
 Project management
 Pumps
 Rescue – offshore crews
 Risk management & systems
 Safety – fire/ambulance
 Safety procedures including emergency
 Safety systems & equipment testing
 Subsea pipeline & engineering
 Team building
 Technician Training for New Hires
 Training of trainers
 Underwater systems
 Waste Management
 Water injection and control systems
 Welding
 Well control
 Well equipment
 Wireline

THE CHEVENING SCHOLARSHIPS PROGRAMME

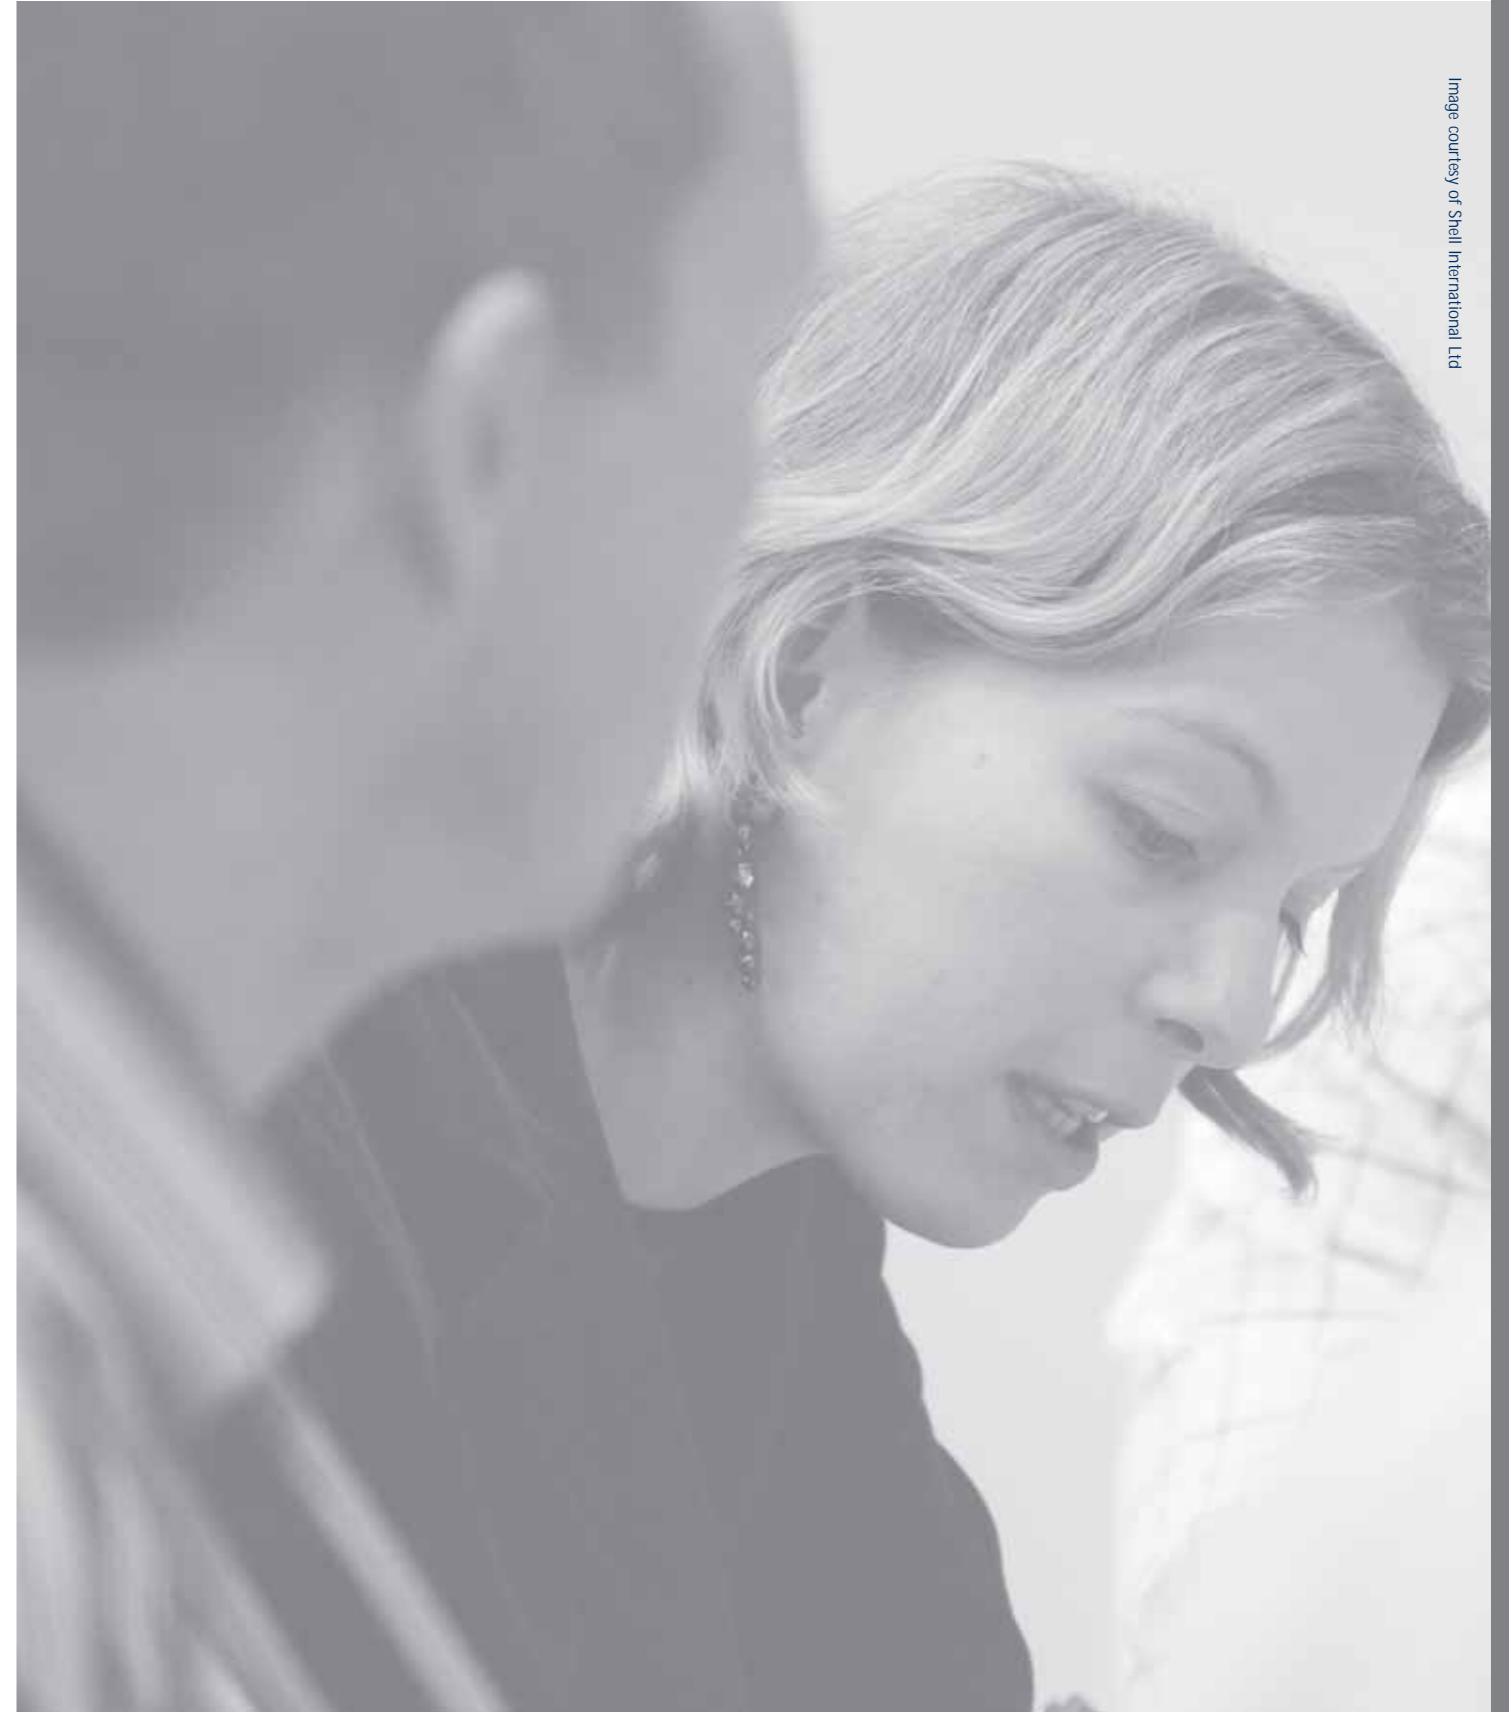

Image courtesy of Shell International Ltd

The Chevening scholarship programme, funded by the Foreign and Commonwealth Office (FCO), and managed by the British Council, the United Kingdom's international organisation for educational opportunities and cultural relations, is one of the most important scholarship programmes in the world. The programme offers an excellent opportunity for international future leaders and promising young professionals, to study in renowned British universities.

The prestigious Chevening scholarships are offered in over 150 countries and in 2006/07 they enabled 1838 talented graduates and young professionals to become familiar with the UK and gain skills which will benefit their countries.

Chevening scholars study in the UK for at least 3 months. The majority study for postgraduate degrees, particularly Masters courses. However, applications for shorter vocational or professional courses as long as they are adequately challenging and relevant are also considered. Chevening scholarships can be used to study most subjects, however in different countries they may target a narrower range of subjects that are especially relevant. In the past, subject areas have included:

AREAS:

- Law and human rights
- Economics and politics
- International relations
- Communications, media and journalism
- Development and gender studies
- Business administration
- Public administration
- Management
- Environmental studies
- Finance and accountancy
- Science and technology
- Medicine and health
- Engineering
- Computing and information technology
- Arts and humanities
- Sociology and other social sciences
- Education
- English language training and linguistics
- Transport studies
- Sports management

REQUIREMENTS:

Competition for Chevening scholarships is intense, and only one in every 25 applicants is successful. A typical successful applicant would be:

- A graduate with proven academic skills.
- Committed to return to their country and contribute to the socio-economic development of their country through implementing new skills and knowledge acquired in the UK.
- Be able to show at interview that they possess the personal qualities to benefit from their scholarship and use it to succeed in their chosen career.
- Have a clear idea how their scholarship will benefit their country on their return.
- Have good English Language skills and must have an IELTS of 6.5.

APPLICATION PROCEDURE:

The Chevening Scholarship Programme is a truly global programme and operates in over 150 countries around the world. As the programme is so diverse and far-reaching there isn't a single timetable for applications and so it is important to check with the local British Council office for country deadlines for applications.

Although the timetable for deadlines may change from country to country the application process remains the same.

Each country will advertise when they are inviting applications for Chevening scholarships and will state their deadline for applications. Applications will not be dealt with after the stated date.

Stage 1: Applications are checked to ensure that the applicant meets the standard Chevening criteria (see above under requirements) plus any other specified local criteria (stated on the country pages of the Chevening website and in the local advertisements).

Stage 2: If an application meets all of the criteria for the scholarship then the candidate will be short-listed and the local office will invite them to attend an interview.

Stage 3: Candidates will be interviewed by a panel of interviewers – normally consisting of a member of the British Embassy or High Commission and a member of the British Council.

Stage 4: As the competition for scholarships is intense and funds limited, it is not possible to recommend for all successful candidates the length of award and level of study requested on their application.

Any award of a Scholarship is conditional on the following:

- confirmation from the Foreign and Commonwealth Office in London that the nomination is acceptable;
- there being sufficient funds available;
- the British Council being able to place candidates on a suitable course;
- the British Council being satisfied with the results of a medical examination which candidates will be asked to undertake prior to departure.

SCHOLARSHIP AMOUNT AND COVER:

There are different types of award which range from fully funded scholarships that cover tuition fees, monthly stipend and various one-off allowances to part funded scholarships which can vary from award to award and cover part/full stipend and/or allowances.

CHOICE OF INSTITUTION:

Candidates have freedom of choice when identifying the institution where he or she wishes to study. The British Council site specialised in education, www.educationuk.org, has information on over 1,500 institutions for education in the United Kingdom.

In the UK, companies, including many of the world's major corporations, plug directly into the heart of global finance, global creative and professional services, global media and global talent. They enjoy access to world-class science and academia and link into a wide network of smaller enterprises, many of which are also world leaders in their fields.

A unique multicultural and entrepreneurial economy, the UK is at the hub of international business, bringing the world to a company's door. In short, it is the gateway to the globe.

You too can be at the heart of this global crossroads. Start by talking to UK Trade & Investment.
